\$27.00	Mobile Home
\$27.00	HVAC
\$27.00	Safety
\$27.00	Consultation

NOTES:

1. Depending on the size of the service the inspection fees may change.
2. Inspections are a state requirement.
3. Any new service must pass a state electrical inspection before Benton County Electric System will run the service.
4. Customers may not need all of the inspections listed above, they can call the office or speak to an engineer if they have any questions.
5. The state also requires a copy of septic papers from the Benton County Health Department, the service will not be hooked up until we have a copy of this.
6. If a well pump system is going to be used you will need to pay for a rough-in and final inspections on that system in addition to those purchased on the structure.
7. Mobile Home inspection will require an installation decal on the inside breaker box before the State Inspector will release for Benton County Electric to run any service.
